

# Glucosamine Sulphate 500mg

# Millions & Millions®

## For Active Individuals

Naturally present in the human body, Glucosamine is a substance that can be found in the fluid around the joints where it functions as a 'shock absorber'. By helping to lubricate the cartilage and reduce friction during movement, this natural compound provides a high level of support, maintenance and protection. Whether you are physically active and exercise on a regular basis or are an older adult suffering from increased 'wear and tear', this marine-sourced formula can help keep you moving with confidence.
