The results reported relate to samples received in the laboratory and may not be representative of a whole batch.

Tests covered by this certificate were conducted in accordance with i2 F.A.S.T's SOPs.

Note: All assessments of compliance with specifications are based on actual analytical results with no contribution from uncertainty of measurement. Application of uncertainty of measurement would provide a range within which the true result lies. Estimates of measurement uncertainty are available for all accredited methods in the Documents section of LIMS.

This certificate should not be reproduced, except in full, without the express permission of i2 F.A.S.T

LOD = Limit of Determination. This is the lowest reportable limit of the test.

Accreditation shown as "UKAS" refers to accreditation to ISO/IEC 17025:2017.

All analysis was carried out at i2 FAST (Poland), Pionierów 39, 41-711 Ruda Śląska, Poland

1 - Recovery outside 60-140 %

5 - Result has been recovery corrected

29 - LOD raised due to an interfering compound

133 - LOD raised due to sample matrix effects

The results reported relate to samples received in the laboratory and may not be representative of a whole batch.
Tests covered by this certificate were conducted in accordance with i2 F.A.S.T's SOPs.
Note: All assessments of compliance with specifications are based on actual analytical results with no contribution from uncertainty of measurement. Application of uncertainty of measurement would provide a range within which the true result lies. Estimates of measurement uncertainty are available for all accredited methods in the Documents section of LIMS.
This certificate should not be reproduced, except in full, without the express permission of i2 F.A.S.T
LOD = Limit of Determination. This is the lowest reportable limit of the test.
Accreditation shown as "UKAS" refers to accreditation to ISO/IEC 17025:2017.
All analysis was carried out at i2 FAST (Poland), Pionierów 39, 41-711 Ruda Śląska., Poland
1 - Recovery outside 60-140 %
5 - Result has been recovery corrected
29 - LOD raised due to an interfering compound
133 - LOD raised due to sample matrix effects
