

Vitamin B12 10µg

Millions & Millions®

Putting the Spring in Your Step

Designed to support everyday energy and vitality, this formula provides an impressive 400% of your daily Vitamin B12 requirement. Vitamin B12 is associated with a wide range of health benefits, supporting everything from immunity and psychological function to nerve function and the formation of red blood cells. But the main role of Vitamin B12 in the body is to support energy metabolism (the conversion of food into energy) and to help reduce feelings of tiredness. This high level of energy support is ideal for those with busy lifestyles, but it is also extra important for vegetarians and vegans since the main sources of Vitamin B12 are from animal products (meat, fish and dairy).
